EXPERIENCE

Software Developer | Software Objectives
12/2015 – Current
- Developed a sketching app using C# and WPF to assist in mathematics and geometry involved in roof construction
- Developed a work portal for tradesmen using AngularJS to help them manage their work and customers while away from home
- Developed a device configuration utility and live dashboard for Internet of Things devices running on Windows IOT
- Converted an existing cattle management WPF app into an AngularJS website
- Maintained existing finance software, card game software and an airport parking website
- Answered to customers and stakeholders throughout project lifecycles to ensure client satisfaction

IT Helpdesk | Salmat
06/2014 – 12/2015
- Communicated with Coles stores having software or hardware issues to determine the nature of the problem
- Took the caller through procedures to potentially fix the issues, or escalated the issue to the correct department if required
- Met and exceeded KPI targets on a daily basis

IT Officer | Municipal Association of Victoria
12/2014 - 2 Week Internship
- Assisted staff with daily personal software and hardware issues, which included diagnosing, repairing and rebuilding workstations.
- Prepared user's new mobile phones and workstations, which included installing Windows and basic software and updating the department's asset register.
